

PRIVACY SECURITY TRUST2005

THIRD ANNUAL CONFERENCE ON
PRIVACY, SECURITY AND TRUST

OCTOBER 12-14, 2005

THE FAIRMONT ALGONQUIN
ST. ANDREWS, NEW BRUNSWICK, CANADA

CALL FOR PARTICIPATION

PST2005 is aimed at scientists, educators, business people, technologists, futurists, and others who have a vision and an understanding of the big challenges (and accompanying advances) that should shape the research agenda in privacy, security and trust.

We are seeking visionaries from all disciplines in academia, industry and the public sector who are pursuing fundamental advances to re-architect cyberspace – to create an information and communications infrastructure that is private, secure and trustworthy for researchers, businesses, government and our citizens. This new cyber environment will allow Canadians to take full advantage of advanced applications of technology in e-Government, e-Health, e-Learning and e-Commerce.

PST2005 will present a stimulating mix of keynote speakers, research papers, panel discussions and social events that will facilitate:

- Meeting the Canadian PST community
- Networking with fellow researchers and professionals
- Posing important questions
- Defining technical and social challenges
- Exposing and sharing current research
- Discussing the tools practitioners need researchers to develop
- Identifying the gaps and tackling the big issues – the exciting, deep challenges yet to be met in PST research
- Staying abreast of the threats and risks in cyberspace
